

REACH STATUS OF PRODUCTS SUPPLIED BY MAGNA COLOURS LTD

Under the REACH regulations, all products supplied by Magna Colours Ltd are classified as 'preparations' and are as such exempt from registration with ECHA in Helsinki. (Products that are classified as individual chemical 'substances' – typically identified with a discreet CAS or EINECS number – do require registration). Magna Colours Ltd has therefore no responsibility for registration of any product that we supply.

Magna Colours has contacted all of our suppliers to ensure that all of the raw materials/products used by Magna Colours Ltd will either be registered under REACH, contain substances that will be registered under REACH, for the specific end use to which our products are used or are imported in volumes below the REACH registration threshold of 1000kg. To date we are not aware of any raw materials that will not be registered under REACH or which will be imported above the 1000kg threshold.

Magna Colours Ltd has studied the SVHC list issued by the ECHA in June 2020 and can confirm that none of the 4 new chemical substance added to this list (and for avoidance of doubt the 205 existing SVHC substances) are contained within any product supplied by Magna Colours Ltd. Should the SVHC list be expanded Magna Colours Ltd will review all current 'preparations' that are supplied, and will advise customers accordingly.

Issue No: 20

Review date: July 2020
